

AI Usage DISCLOSURE FORM

1. Team Details

Team Name: Dobby

Project / Product Name: Dobby-Teachable voice Automation.

Organization / Institution (if any): M.S.Ramaiah Institution of Technology (MSRIT)

Submission Date: 30 september 2026

2. AI Usage Declaration

Did your team use any Artificial Intelligence (AI) in developing this project? Yes / No

:yes

3. Purpose of AI Usage (Brief Details)

Idea generation / brainstorming : Yes – used for brainstorming and refining project concepts and feature.

Code generation or assistance:Yes – used for code generation, debugging, troubleshooting, and implementation assistance.

UI / UX design:Yes – used for interface ideas and design refinement

Content creation :Yes – used for documentation, README content, presentation content, and demo scripting.

Data analysis:No / Not applicable

Testing / debugging :Yes – AI assistance was used to identify bugs, interpret error logs, troubleshoot Android/backend integration issues, and suggest fixes.

Other:Documentation, README preparation, presentation content, and demo-script refinement.

4. Feature Origin Classification (Please add/delete based on the number of the feature)

1. Feature Name:Voice Interaction and Natural-Language Commands

2. Self-Generated/AI-Generated/Both:Both

3. Description (include AI tools/platform Used, prompt used , Output Summary, Modification) : The concept and intended user experience were self-generated. ChatGPT and Devin were used for implementation assistance, debugging, and refinement. Prompts focused on implementing Android voice interaction, speech-to-text, text-to-speech, and natural-language command handling. The AI-generated suggestions were reviewed, modified, integrated, and tested in the Android application. Google Gemini is used in the final product for natural-language intent understanding and response generation.

1. Feature Name : Teach & Demonstrate Learning Mode

2. Self-Generated/AI-Generated/Both : Both

3. Description (include AI tools/platform Used, prompt used , Output Summary, Modification) : The core concept of teaching Dobby a workflow through user demonstration was self-generated. ChatGPT and Devin were used to assist with implementation of the learning mode, Accessibility Service observation, workflow capture, and state handling. Prompts focused on implementing semantic UI observation and converting demonstrated interactions into structured workflows. The generated implementation was reviewed, modified, built, and tested on the Android device

Feature Name:

Semantic Screen Observation and Workflow Representation

Self-Generated/AI-Generated/Both:

Both

Description:

The requirement for semantic rather than coordinate-based automation was defined as part of the project concept. AI coding assistance was used to implement Accessibility-based observation, capture visible text, content descriptions, UI classes, package information, and interaction events, and represent them as structured workflow steps. The implementation was modified and tested on the target Android device.

Feature Name:

Workflow Storage and Reuse

Self-Generated/AI-Generated/Both:

Both

Description:

The idea of storing a demonstrated workflow and reusing it through a later voice command was part of the project design. ChatGPT and Devin assisted with workflow management, persistence, matching, and execution logic. The generated code was reviewed, modified, integrated with the Android application, and tested.

Feature Name:

Floating Dobby Assistant and State-Based UI

Self-Generated/AI-Generated/Both:

Both

Description:

The Dobby assistant concept, floating interaction model, and desired interaction states were defined for the project. AI assistance was used for Android implementation, UI refinement, debugging, and integration. The implementation was modified and tested to support the floating assistant and states such as listening, thinking, acting, speaking, done, error, and teaching.

...

5. Ethical & Compliance Confirmation

AI usage complies with guidelines and policies. **Yes**

No proprietary or copyrighted data misused. **I Agree**

6. Declaration & Sign-Off

Name of Team Representative: yogitha mukkamalla

Role: team representative, developer

Signature: myl

Date: 30 september 2026
